```java
class Solution {
    public boolean isPalindrome(int x) {
        String f = String.valueOf(x);
        String backwards = "";

        for (int i = f.length() - 1; i >= 0; i--){
            backwards += f.charAt(i);
        }
        return f.equals(backwards);
    }
}
```
